

AT HOME ADAPTATIONS

For Pre K-5th Grade

Have you ever wondered what it would be like to work in an aquarium? Being an aquarist is a super cool job! There are many important tasks to complete during an aquarist's day. Day-to-day duties include taking care of fish and aquatic animals to make sure they live in a safe and nurturing environment. Aquarists monitor and maintain the equipment that supports the animals' habitats, prepare food, feed the animals, and clean the tanks.

At Home Activity:

1. **Create your own sea star!** Create a sea star shape on paper and place cheerios along the points of the sea star's arms to make eyespots. Count to make sure you have five points on your sea star. Fun fact: sea stars have eyespots on the tip of each arm that help them detect light!
2. **Create your own jellyfish!** Using a paper bag, cut from the opening of the bag up to the bottom of the bag to create the jellyfish tentacles. Color your jellyfish your favorite colors!
3. **Share your learning journey on social media!**
